

A Brief Note about Double D Horse Trailer's Safe-Tack®

What is Safe-Tack®?

Well, funny thing that you ask that question because we're having a sale all this week on our new 2011 bumper pull and gooseneck horse trailers with Safe-Tack®.

But that didn't answer your question, did it. This will.

Safe-Tack® is our exclusive, patent pending design available in many of our horse trailers. Safe-Tack® makes life easier and safer for both you and your horses. How is this so? Well, let me list the reasons below.

- **Safe-Tack® provides you with additional space to store tack and equipment without making you give up any space inside the horse trailer. We built the storage space inside the left rear door of the trailer. Inside, there are adjustable saddle racks, bridle hooks, and a light. You can lock it up as well.**
- **Safe-Tack's design lets you swing wide both rear doors so you have plenty of room to load and unload.**
- **With the Safe-Tack® design, we also give you an additional divider. If you have a three-horse slant load, that third horse has a divider between him and the rear doors. This means when you go to unload, that first guy off can't go backing out on you. He has to wait until you're ready and release the divider.**
- **Safe-Tack® is available with models that have dressing rooms. So you have the storage space in the dressing room *and* additional space in the Safe-Tack® compartment. All of this without sacrificing any space devoted to where your horses travel.**

This is just a quick rundown of what Safe-Tack's all about. If you'd like to see it for yourself,

click [here](#). And as always call 800-435-6274 or email sales@doubledtrailers.com with any questions. We'd love to hear from you!
